

PROJECT MANAGER, P.ENG.

CALGARY, ALBERTA

Swirltex Inc. (Swirltex) is focused on the development and application of innovative technologies for the treatment of difficult wastewater streams. Our expertise and solutions have demonstrated the ability to provide safe reliable water for reuse applications. Our patented process and modular system saves energy, is economical, and provides a service to customers where they need it and when they need it.

Since the beginning we have thought about innovative ways to manipulate an incoming waste stream that enhances conventional treatment. We are focused on our customers and always developing new solutions to meet their challenges.

Our vision is to change how water filtration has been done in the past to help industries and municipalities turn wastewater into a resource towards a Net Zero Water future.

Purpose of the Position

At Swirltex we are always striving to do things differently! We are looking for a Project Manager who thinks outside of the box and is looking to work with an exciting innovative wastewater treatment technology. As an energetic and highly motivated team player, the successful candidate will also have in-depth knowledge of water treatment technologies applied in various industrial applications.

At Swirltex, our team is the key to our success. We take pride in recruiting the best talent available for all areas of our business.
